

RECOMMENDATION

Relating to the project: “BHRMDA – efficiency and professionalism in human resource management and development in Bulgaria” by the OP “Administrative capacity”, financed by EU European Social Fund - ZAEDNO Ltd’ team in a consortium with Market Links Ltd and Taurus Consultants Ltd, has realized a project for training needs analysis in the field of Human Resource Management and Development (HRMD) for our members.

During the implementation of the project, we would like to mention, Dragomira Shuleva’ extraordinary work and professionalism. Thus, the deliverables were: a questionnaire for the research; research manual and four focus groups. Also qualitative and quantitative research were carried out and their findings were elaborate in a report with analysis with recommendations, regarding the strategy of the BHRMDA members future trainings.

The research’ results were presented in a public event, using the “World Cafe” method, led by Dragomira Shuleva. Summaries for those activities were published by Karieri newspaper, Dnevnik newspaper, Expert.bg, Jobs.bg and many others.

The results from the research were exclusively helpful for us because they gave us a possibility to receive a clear idea for the training needs of our participants and to organize seminars, round tables and other events on the most wanted professional topics.

We would like to express our gratitude to Dragomira Shuleva for her personal engagement with BHRMDA’ project and we do believe in our future cooperation for realization of many other projects in human resource development field.
